

Sinhala Translation

Manual Verification Guide

Banking Support-Ticket Triage Dataset — Swift Project

Dataset file: datasets/llm-zeroshot/sinhala/train_labeled.csv

Source (English): datasets/llm-zeroshot/english/train_labeled.csv

Style reference: datasets/translation/SINHALA_STYLE.md

Rows translated: 10,003 / 10,003 (100%)

Categories covered: 77 / 77 (100%)

Register: Colloquial, code-mixed spoken Sinhala

Status as of: 2026-07-20

1. Purpose & Scope

This guide is for a human reviewer checking the Sinhala column of the banking support-ticket triage dataset. Every row was hand-translated (not machine translated) into **colloquial, code-mixed spoken Sinhala** — the way a Sri Lankan customer actually types into a bank's chat support, not formal/literary Sinhala. Two things need checking per row:

1. **Translation correctness** — does `text_si` convey the same request/complaint/question as `text_en`, in the correct register?
2. **Label correctness** — are `sentiment` and `priority` still appropriate for the row? (These were copied verbatim from the English row, so they should already match — but flag anything that reads oddly.)

This is not a linguistics audit of every one of the 10,003 rows individually — use the sampling methodology in Section 7 unless you want to review exhaustively.

2. File & Column Reference

Column	Meaning
<code>text_en</code>	Original English support-ticket text (ground truth for meaning).
<code>text_si</code>	Colloquial Sinhala translation — the column being reviewed.
<code>category</code>	One of 77 intent categories (Banking77-style, e.g. <code>card_arrival</code> , <code>transfer_fee_charged</code>).
<code>sentiment</code>	One of Positive Neutral Negative — copied verbatim from the English row.
<code>priority</code>	One of Low Medium High — copied verbatim from the English row.

Rows are in the **same order** as `english/train_labeled.csv`, so row *N* in one file is the same ticket as row *N* in the other — open both side by side (or in adjacent spreadsheet columns) for the fastest review.

3. Label Distribution (for context when judging priority/sentiment)

Sentiment	Count	%
Neutral	8,282	82.8%
Positive	1,190	11.9%
Negative	531	5.3%

Priority	Count	%
Low	5,005	50.0%
Medium	3,288	32.9%
High	1,710	17.1%

Most tickets are plain informational questions (Neutral/Low). Negative sentiment and High priority cluster around fraud, unauthorized withdrawals, and failed transfers — if a translated row in one of those categories reads as flat or overly polite in Sinhala, that's worth flagging even though the label itself is untouched.

4. Register & Style Rules

These are the rules every translated row was written against — use them as your correctness rubric.

- Address the bank as ඔයාලා / ඔයාලාගේ ("you all / your"), never the formal ඔබ.
- Spoken question words: කොතොමද (how), මොකක්ද / මොකද (what/why), කවදද (when), කොතෙක් (where), ඇයි (why) — never the literary කෙසේද, කුමක්ද.
- Classifier එක attached to English nouns: කාඩ් එක (the card), ජේමන්ට් එක (the payment).
- "want/need" → ඕනේ; "can...?" → පුළුවන්ද; polite request → ...කරන්නකෝ.
- Spoken negatives: නෑ (no/not), නම්බුන්නෑ (didn't get), බෑ (can't).
- Conversational punctuation — commas, mild interjections (අනේ, හලෝ) are expected, not errors.

Term Glossary (English loanwords kept in Sinhala script)

English	Sinhala (colloquial)
card	කාඩ් එක
card payment	කාඩ් ජේමන්ට් එක
payment	ජේමන්ට් එක
exchange rate	එක්ස්චේන්ජ් රේට් එක
transfer	ට්‍රාන්ස්ෆර් එක
transaction	ට්‍රාන්සැක්ෂන් එක
account / app	account එක / ඇප් එක
refund / fee	රිෆන්ඩ් එක / ෆී එක
money	සල්ලි
charged extra / overcharged	වැඩිපුර අයකරලා
wrong / incorrect	වැරදියි / නරි නෑ
abroad / overseas	8060 / 8060ටින්
foreign currency	වෙන කරන්සි එකක් / විදේශ මුදල්

Currency codes and amounts are intentionally NOT translated: LKR / USD stay in Roman script, and Rupee amounts (e.g. Rs 10,000) stay as digits. This is correct, not a missed translation.

5. Verification Methodology

5.1 Sampling strategy

Reviewing all 10,003 rows is not required. Recommended approach:

1. **Stratified spot-check:** pick 3–5 random rows from each of the 77 categories (≈ 250 –400 rows total) — use Section 8's category index to plan this.
2. **Full review of high-signal categories:** categories with High-priority or Negative-sentiment concentration (fraud/unauthorized-activity types like `cash_withdrawal_not_recognised`, `compromised_card`, `declined_cash_withdrawal`) deserve a full pass since register mistakes there are more consequential.
3. **Targeted review of the Known Issues list** (Section 6) — these rows are already flagged as containing residual English place names; confirm the Sinhala rendering is still faithful even though the English source wasn't re-localized.

5.2 Per-row checklist

Check	What to look for
Meaning match	Every question/complaint/request in <code>text_en</code> is present in <code>text_si</code> . No dropped clauses, no invented content.
Register	Reads as something a person would actually type in a chat — not textbook/formal Sinhala. English banking nouns kept in Sinhala script per the glossary.
Person/address	මගාලා used for the bank, not formal මග.
Numbers/currency	Amounts and LKR/USD codes preserved exactly, unmodified from the English row.
Sentiment fit	Tone of the Sinhala text is consistent with the labeled sentiment (e.g. a Negative/High row shouldn't read as calm/neutral in translation).
Priority fit	Urgency implied by the Sinhala phrasing matches Low/Medium/High — this is really an English-row property, but a bad translation can obscure urgency cues (e.g. "immediately", "urgent").

6. Known Issues — Residual English-Language Artifacts

These rows still contain **un-localized foreign place names / currencies** in the *English source* (missed by the earlier Sri-Lanka localization pass — see `datasets/localization/`). The Sinhala translations below were done **faithfully against the English as-is** — i.e. "Bora Bora" was translated as Bora Bora, not silently changed to a Sri Lankan location. Do not flag these as translation bugs; they're queued as a separate future localization pass. If you spot more while sampling, add them to this list.

Row idx	Category	Artifact	English snippet
2524	card_payment_fee_charged	France	"I'm going on holiday to France for 6 weeks with my family and the cat, Fluffy..."
1483	lost_or_stolen_card	Spain	"...on vacation in Spain and someone stole my bag with my phone and wallet with cards..."
4927	declined_cash_withdrawal	Notting Hill	"...withdrawal money from the ATM in Notting Hill but it didn't work..."
6924	change_pin	Austria	"How can I change my PIN even though I'm out of the country in Austria..."
6991	change_pin	Germany	"...changed at any Visa or MasterCard ATM with Pin services, excluding co[untries like Germany]..."
6600	transfer_timing	China	"I desperately need to transfer something from China, Please give me the wait time."
5435	request_refund	Japan	"It's been over a month and i still haven't received my goods!..."
5801	Refund_not_showing_up	Pet Smart	"Three months ago I bought a new house for my cat, fluffy..."
5970	declined_card_payment	Shell	"Why are the payments being declined on my new card?..."
6255	card_swallowed	Metro bank	"The ATM at Metro bank on High St. Kensington didn't return my card..."
6449	transaction_charged_twice	Seattle	"I went for a meal in Seattle and paid the bill but I think they charged me twice..."
7327	transfer_fee_charged	Bora Bora	"I just recently got a new beach condo in Bora Bora..."
7344	receiving_money	"GPB" (typo, likely GBP)	"Will my GPB update my salary"
7546	failed_transfer	London / £200,000	"Hi, I'm buying my son Bertie a starter home in London..."
8760	balance_not_updated_after_bank_transfer	United Kingdom	"How long does a transfer from the United Kingdom take?..."
8895	cash_withdrawal_not_recognised	New York	"Someone is using my card to purchase flights to New York..."

9419	cash_withdrawal_charge	Heathrow airport	"...cash out of a cash machine in Heathrow airport because I wanted to buy some new sunglasses..."
9491	cash_withdrawal_charge	Nandos, Leeds	"...a cash withdrawal I made outside Nandos in Leeds. What is that for? Is it fraud?"

Not artifacts — intentionally left in English/global form: categories that are inherently about international support are supposed to mention countries/currencies — this is the product's actual behavior, not a localization gap. Leave these as-is:

- `country_support` (129 rows) — asks "which countries do you support" (US, EU, Sri Lanka, Germany, Greece, Africa, Indonesia, etc. are all legitimate example countries in these questions).
- `fiat_currency_support`, `supported_cards_and_currencies`, `exchange_via_app` — currency-support questions (Bucket C), explicitly excluded from the earlier Sri-Lanka localization pass by design.
- `card_delivery_estimate` — "how long to the US/EU" style delivery-time questions are meant to reference multiple countries.

7. Category Index (all 77, for sampling)

#	Category	Rows
1	card_arrival	153
2	card_linking	139
3	exchange_rate	112
4	card_payment_wrong_exchange_rate	167
5	extra_charge_on_statement	166
6	pending_cash_withdrawal	143
7	fiat_currency_support	126
8	card_delivery_estimate	112
9	automatic_top_up	127
10	card_not_working	112
11	exchange_via_app	118
12	lost_or_stolen_card	82
13	age_limit	110
14	pin_blocked	115
15	contactless_not_working	35
16	top_up_by_bank_transfer_charge	111
17	pending_top_up	149
18	cancel_transfer	157
19	top_up_limits	97
20	wrong_amount_of_cash_received	180
21	card_payment_fee_charged	187
22	transfer_not_received_by_recipient	171
23	supported_cards_and_currencies	129
24	getting_virtual_card	98
25	card_acceptance	59
26	top_up_reverted	146
27	balance_not_updated_after_cheque_or_cash_deposit	181
28	card_payment_not_recognised	168

29	edit_personal_details	121
30	why_verify_identity	121
31	unable_to_verify_identity	102
32	get_physical_card	106
33	visa_or_mastercard	135
34	topping_up_by_card	103
35	disposable_card_limits	121
36	compromised_card	86
37	atm_support	87
38	direct_debit_payment_not_recognised	182
39	passcode_forgotten	105
40	declined_cash_withdrawal	173
41	pending_card_payment	159
42	lost_or_stolen_phone	121
43	request_refund	169
44	declined_transfer	133
45	Refund_not_showing_up	162
46	declined_card_payment	153
47	pending_transfer	148
48	terminate_account	108
49	card_swallowed	61
50	transaction_charged_twice	175
51	verify_source_of_funds	113
52	transfer_timing	128
53	reverted_card_payment?	161
54	change_pin	122
55	beneficiary_not_allowed	156
56	transfer_fee_charged	172
57	receiving_money	95
58	failed_transfer	137
59	transfer_into_account	113
60	verify_top_up	126

61	getting_spare_card	129
62	top_up_by_cash_or_cheque	114
63	order_physical_card	120
64	virtual_card_not_working	41
65	wrong_exchange_rate_for_cash_withdrawal	163
66	get_disposable_virtual_card	97
67	top_up_failed	145
68	balance_not_updated_after_bank_transfer	171
69	cash_withdrawal_not_recognised	160
70	exchange_charge	121
71	top_up_by_card_charge	114
72	activate_my_card	159
73	cash_withdrawal_charge	177
74	card_about_to_expire	129
75	apple_pay_or_google_pay	126
76	verify_my_identity	104
77	country_support	129

8. Reporting an Issue

When flagging a row, note the following so it can be traced back and fixed quickly:

1. **Row index** (position in `train_labeled.csv` , 0-based) or the exact `text_en` string.
2. **Category** the row belongs to.
3. **What's wrong** — dropped meaning, wrong register (too formal/too casual), wrong glossary term, wrong number/currency, or sentiment/priority mismatch.
4. **Suggested fix** if you have one — otherwise just the issue is enough.

Generated for the Swift banking-triage dataset project · Sinhala translation phase complete (77/77 categories, 10,003/10,003 rows) · Tamil, Singlish, and Tamilish phases are tracked separately.
